

# OCCUPATIONAL HEALTH AND PRIMARY HEALTHCARE SOLUTION.

HealthONE Connect, a web based Electronic Health Record system allows medical staff to focus on patient care rather than administrative tasks. The entire process is digitized from managing appointments, to medicals, stock management of medicines and consumables, through to issuing the Certificate of Fitness (COF), and reporting.

HealthONE  
Connect

## OCCUPATIONAL HEALTHCARE (OHC) & PRIMARY HEALTHCARE (PHC)

Our footprint is spread out across the following industries:

Mining

Motor  
Manufacturing

Services

Higher Education  
Institutions

Metro Councils

Hospital Groups  
(PHC, OHC)

HealthONE Connect integrates with medical devices for audiometry, vision screening, spirometry, e-vitals, and third-party applications including HR systems, Access Control systems and Pathology Labs

## THE PATIENT/EMPLOYEE JOURNEY

The patient journey is tracked within the application using pre-built, customisable templates and workflows, right from appointment booking to Certificate of Fitness. No more manual processes!

Vision

Audio

Lung Function

Lung X-ray

Blood Pressure

Blood Tests

Occupational  
Risks & History

Physical  
Exam

The patient/employee profile is saved in the system with all associated healthcare records. This allows for better insights to the health and safety of employees, and for proactive interventions where needed.

All assessments are collated and analysed within the solution.

Data from each test is according to personal identifiers and is translated to information that the final assessor can use to complete the certificate.

Trends are also picked up and tracked.

Within a short space of time all tests are completed, and the patient/employee health status can be established.

HealthONE Connect assists with compliance to industry regulations.
